Substance Use Disorder Treatment – Single Level (SUD-SL)

The SUD-SL program is an evidence-based program that promotes positive social behavior and prepares inmates for release by developing the knowledge and skills necessary to avoid substance use relapse and successfully integrate back into the community, thereby reducing recidivism.

The SUD-SL program is designed for offenders who demonstrate the willingness to maintain appropriate behavior to take advantage of such programming and for offenders who have been referred to the program based upon substance use or possession infractions.

The SUD-SL program provides comprehensive substance use disorder services including assessments, treatment planning, and placement into community-based substance use disorder programs.

Location(s): Calipatria State Prison (CAL), California Correctional Center (CCC), Centinela State Prison (CEN), California State Prison, Corcoran (COR), R. J. Donovan Correctional Facility (RJD), and Wasco State Prison (WSP)

Length of Program: 150 days

Enrollment: Inmates will be placed in the SUD-SL program by a Classification Committee based on their eligibility requirements.

Eligibility Requirements: Designed for inmates who are ineligible for Reentry Hub programs and who have a history of substance use disorder or Rules Violation Reports (RVRs) for substance abuse-related offenses. To qualify, offenders must also demonstrate a willingness to maintain appropriate behavior. Single-Level participants who continue to receive substance use disorder related RVRs shall be referred to the Multi-Level Program.

CDCR's Division of Rehabilitative Programs (DRP) manages adult inmate and parolee rehabilitative programs. Its top priority is to provide rehabilitative programming and life skills to offenders in an effort to reduce their likelihood of reoffending after their release from prison. DRP is comprised of the Office of Offender Services (OS), the Office of Correctional Education (OCE), and the Office of Program Accountability and Support (OPAS).
